

NETAFIM & KAIU ALLIANCE FOR SMART FARM SOLUTION

Chris Kim / MD Netafim Korea

NETAFIM™

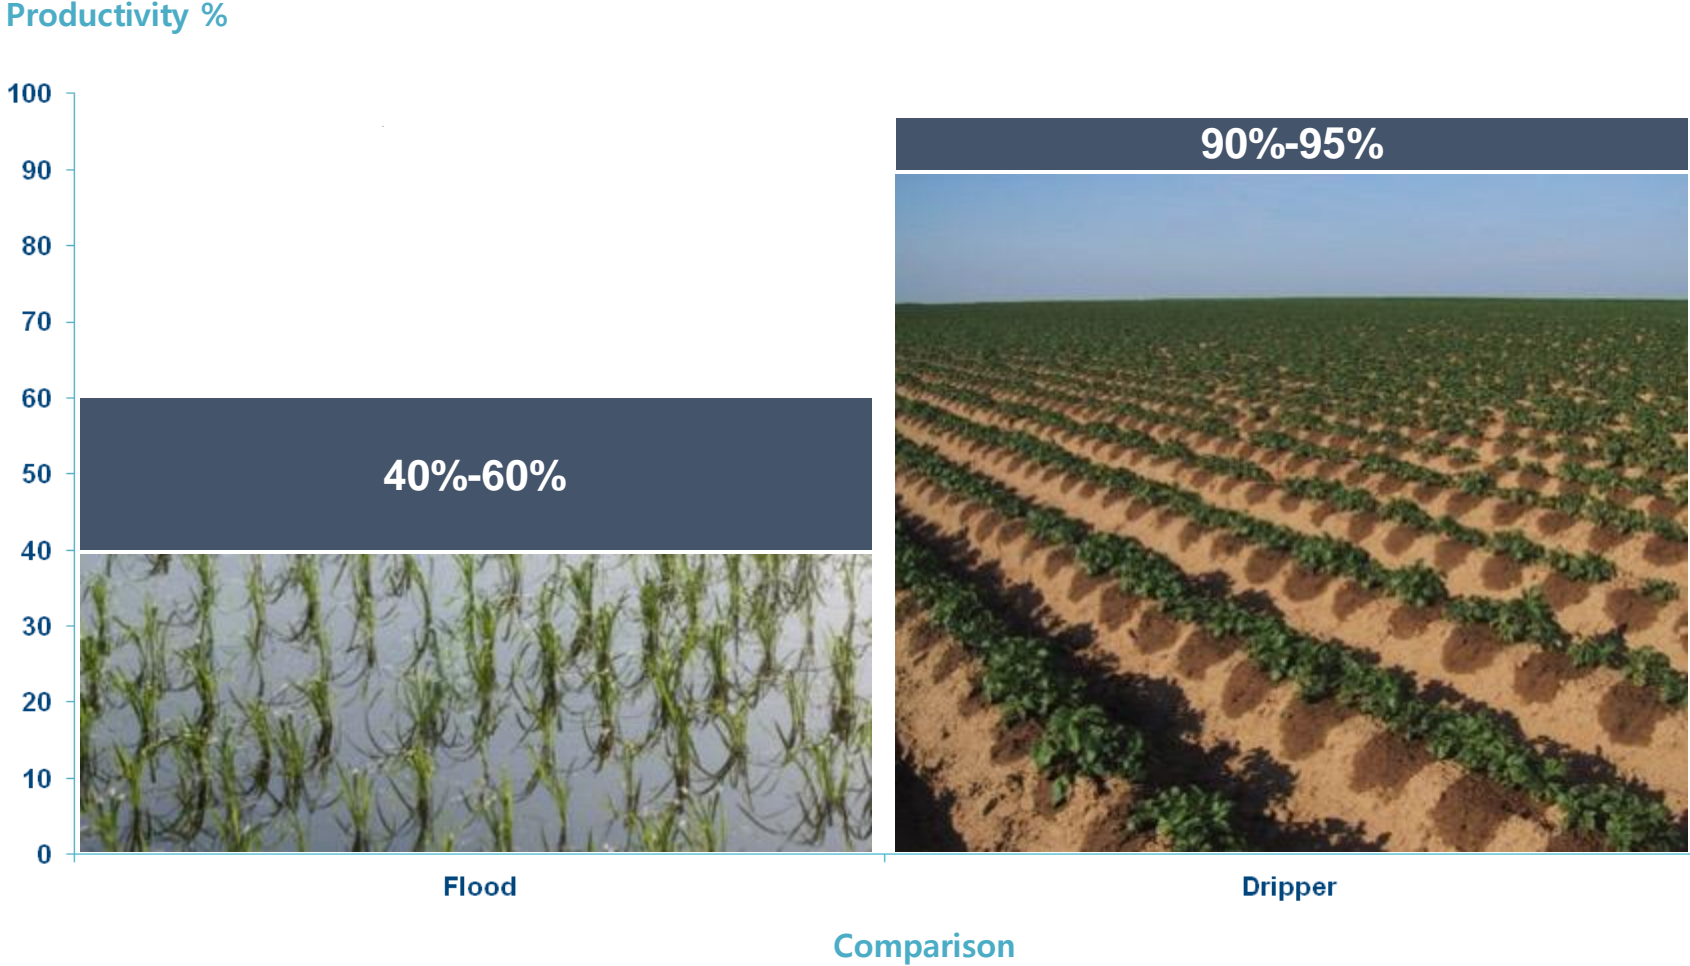

GROW MORE WITH LESS

In 1964 Netafim invented drip irrigation system which has become one of the common technologies for agriculture.

Drip irrigation technology enable farmers to grow more with less resources.

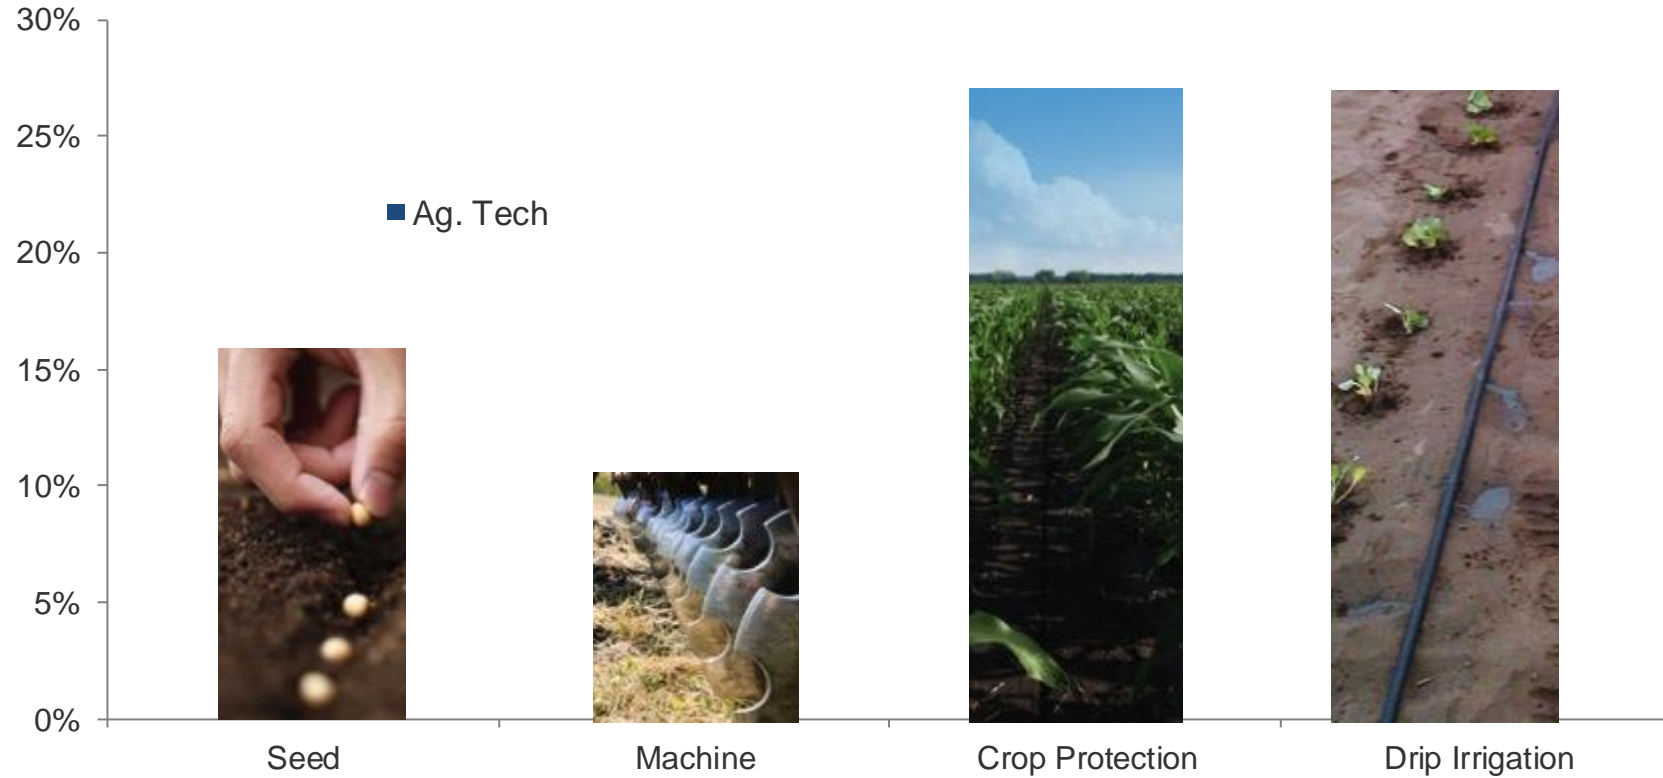

Drip irrigation is the most efficient way to improve productivity.

Source: Netafim Internal Research
Efficiency is defined as the maximum output per unit of area and input.

Farmers need smart investment to achieve better results.

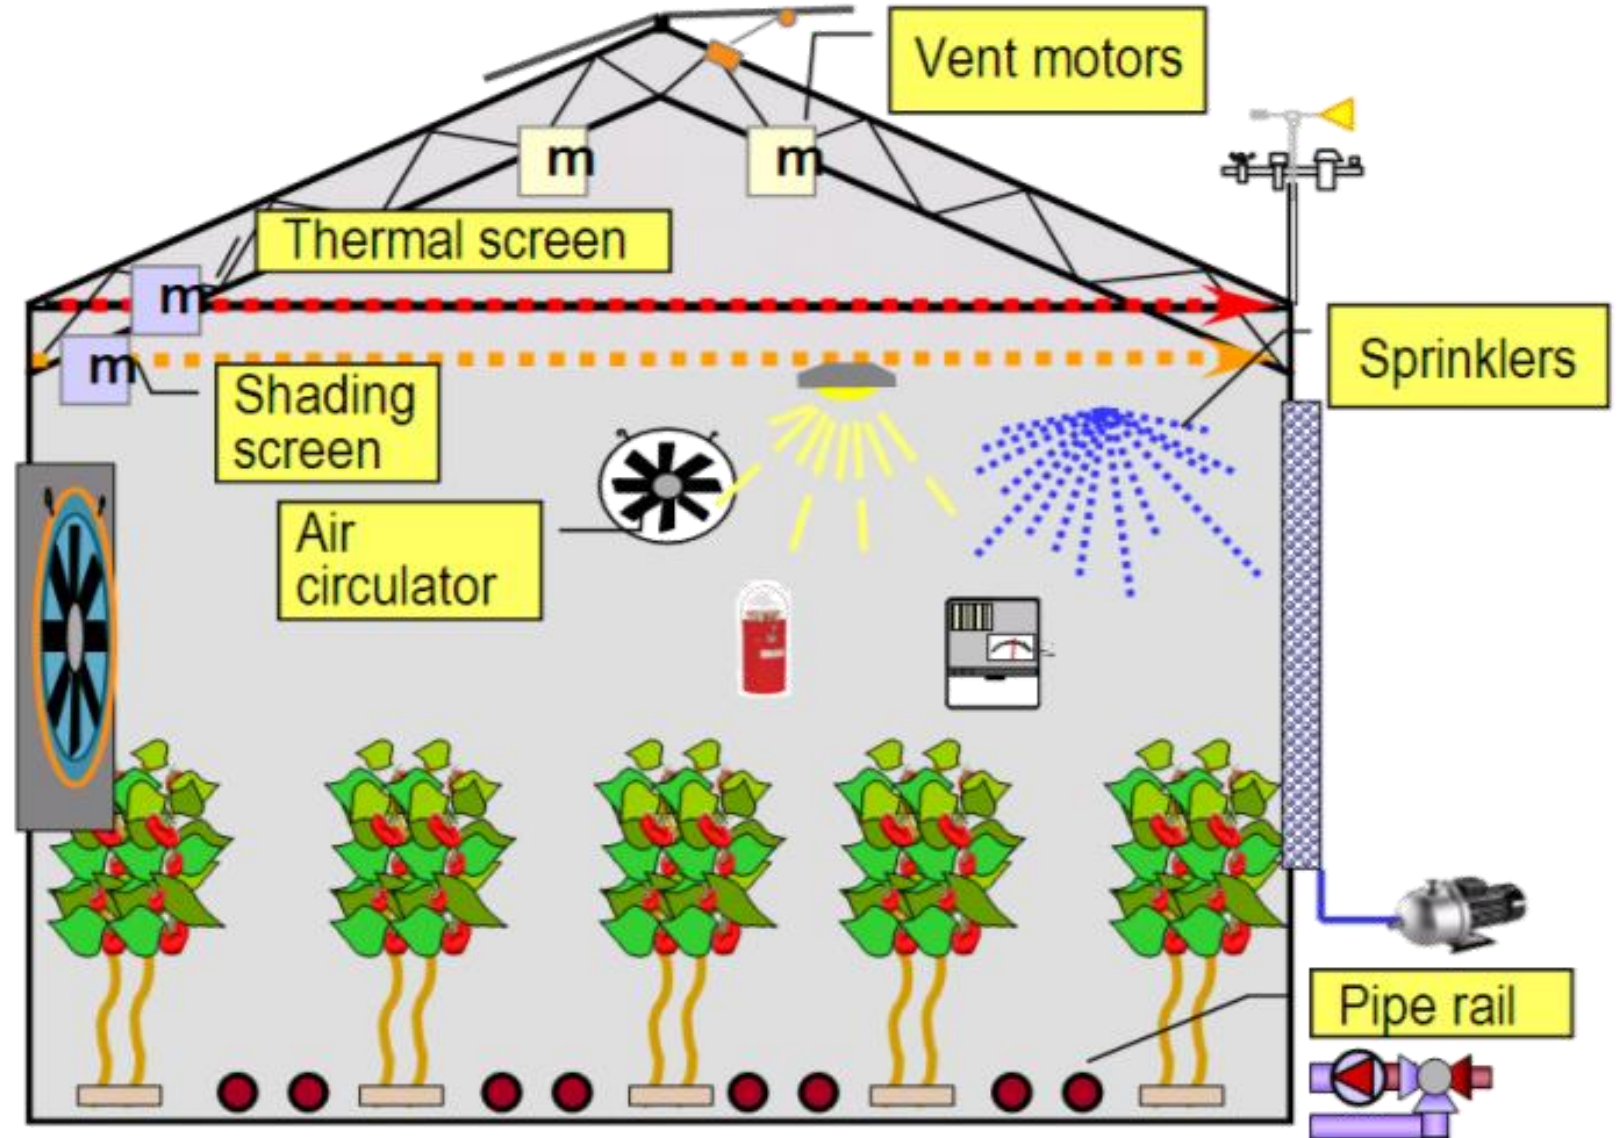

(Productivity %)

Nebraska USA, 2008-2014, (Yellow Maize)

Optimized control for greenhouse is getting more critical.

- Ventilation
- Screens
- Heating
- Misting
- Crop Protection
- Fan & Pad
- CO₂
- Air Circulation
- Light
- Etc.....

THE FARMER'S TARGET

**REDUCE
COST**

**INCREASE
YIELD & PROFITABILITY**

**REDUCE
RISK**

2 Million

Farmers

2 Million farmers worldwide are happy
with Netafim solutions on a daily basis

Smart farm issue ; How to reduce complexity ?

AG TECH: 100+ TECHNOLOGY COMPANIES CHANGING THE FARM

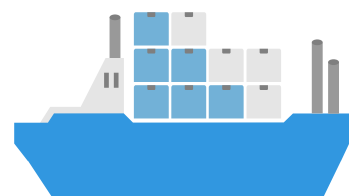

KAIU alliance can provide farmers with optimized solution.

- One Brand, One Channel

Climate control system, HW, SW,
Greenhouse material, Plant factory,
LED, Film, Irrigation products,
Crop monitoring system,
Sensors, Pumps, Valves, Filters, etc...

KAIU provide customers with one-stop solution

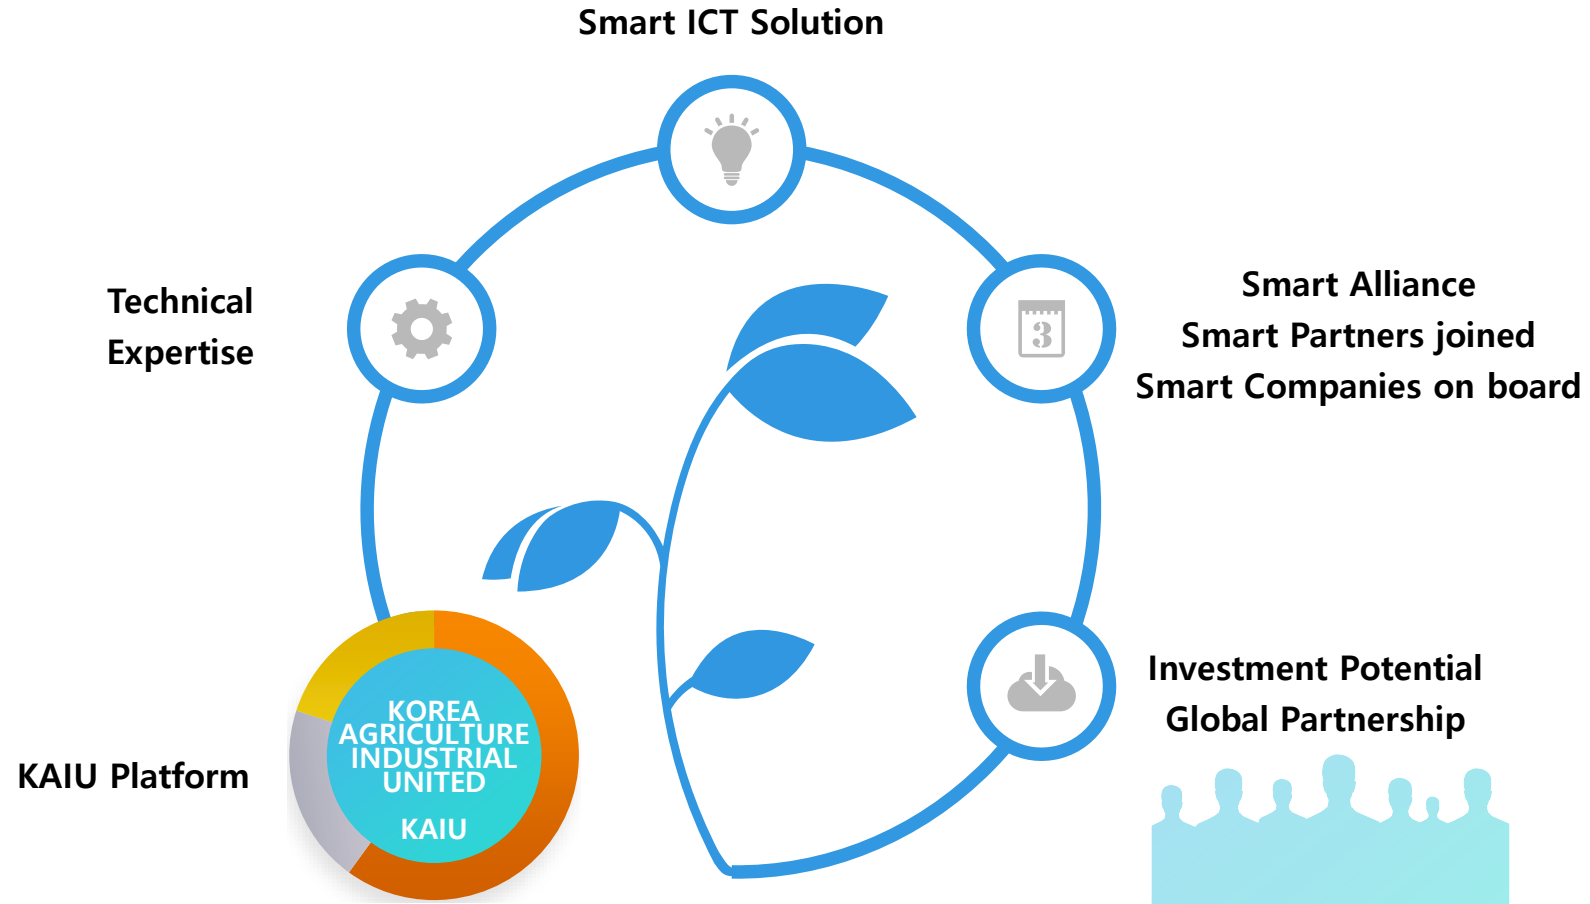

KAIU service desk handle all customer inquiries

1 consolidated brand is good enough

KAIU focus gradually more on the global market

Let's create smart opportunities together !

Thank You!
