

The KAIST logo is located in the top left corner. It consists of the letters 'KAIST' in a bold, blue, sans-serif font. Below the letters is a horizontal blue line that tapers at both ends, resembling a stylized road or a signal wave.

The Road that KAIST Global Commercialization Center sees

OCT 23. 2015.

Vision, Mission, and Core Value with Strategy

1 VISION

- Creating innovative economic value through the technology transfer and global technology commercialization

2 MISSION

- Transferring technology for commercialization into value creation
- Bridging the R&D Institutes, SMEs to the demands of emerging countries

3 GOAL

- Satisfying partner countries' demand and potential needs, not givers
- Revitalizing ICT R&D performances of Korea into value creation of demands

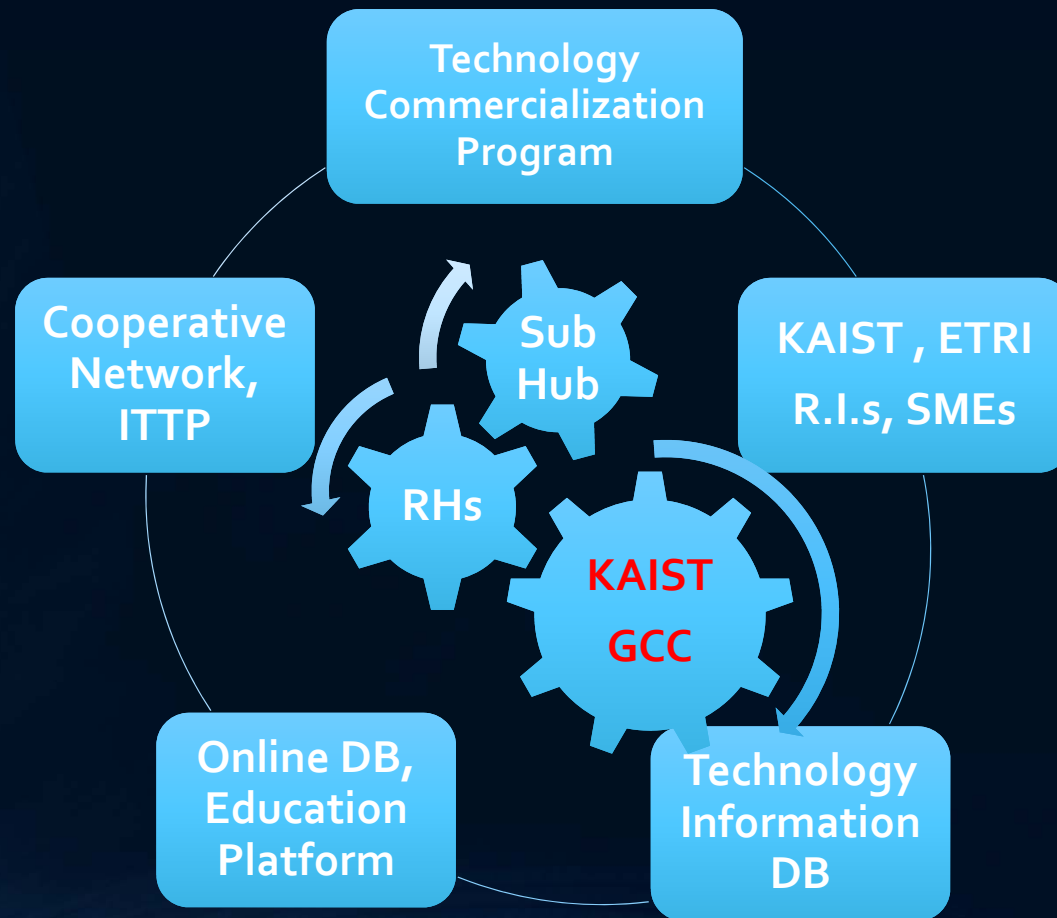

4 STRATEGY

- Pursuing strategic development and cooperation among R&D Institutes, SMEs, Ventures, KAIST ITTP program, and developing countries

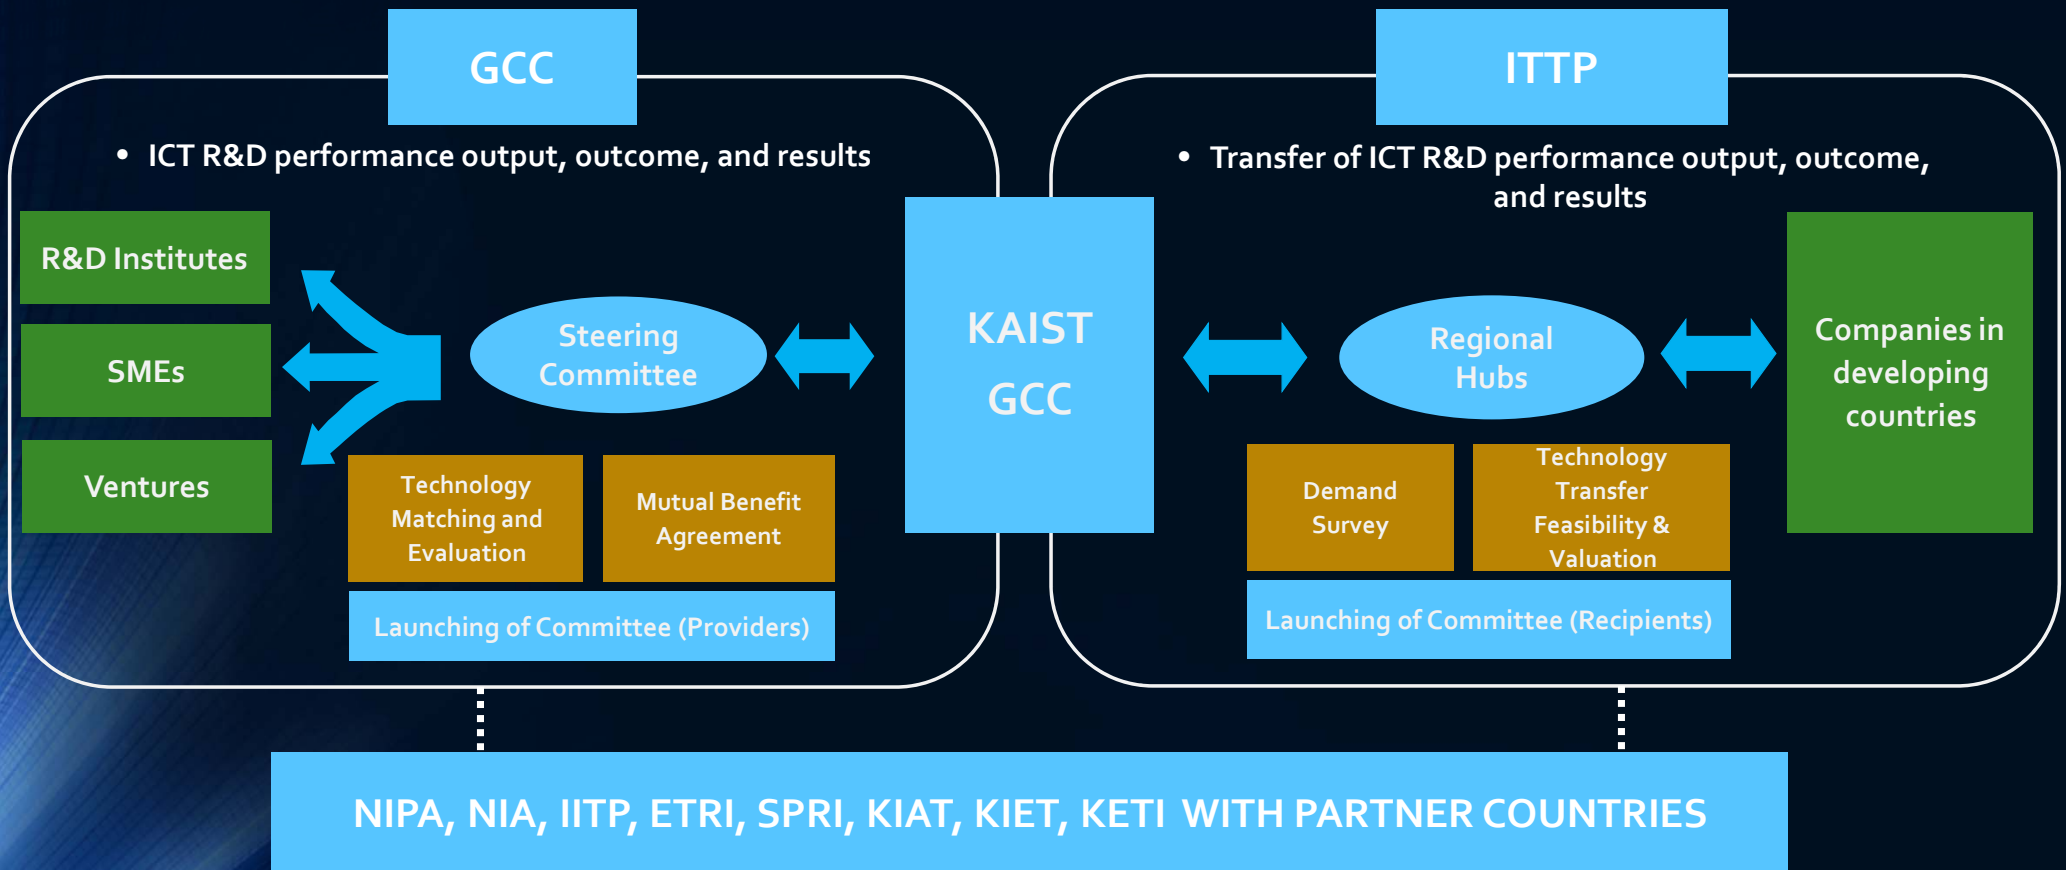

Why KAIST GCC begins and what thinks.

- **It is required to develop integrated technology commercialization support system for developing countries**
 - Finding demands of technology transfer in developing countries to benchmark successful cases of technology commercialization
 - Lack of integrated support system of technology transfer, commercialization, education and consulting for global technology commercialization
- **It is necessary to establish the cooperative network**
 - Needs construction of global cooperative network between Korea and developing countries to provide systematic support system for global technology transfer and commercialization
- **It needs to be focused on ICT, Science & Technology fields**

How KAIST GCC operates : Operation Process

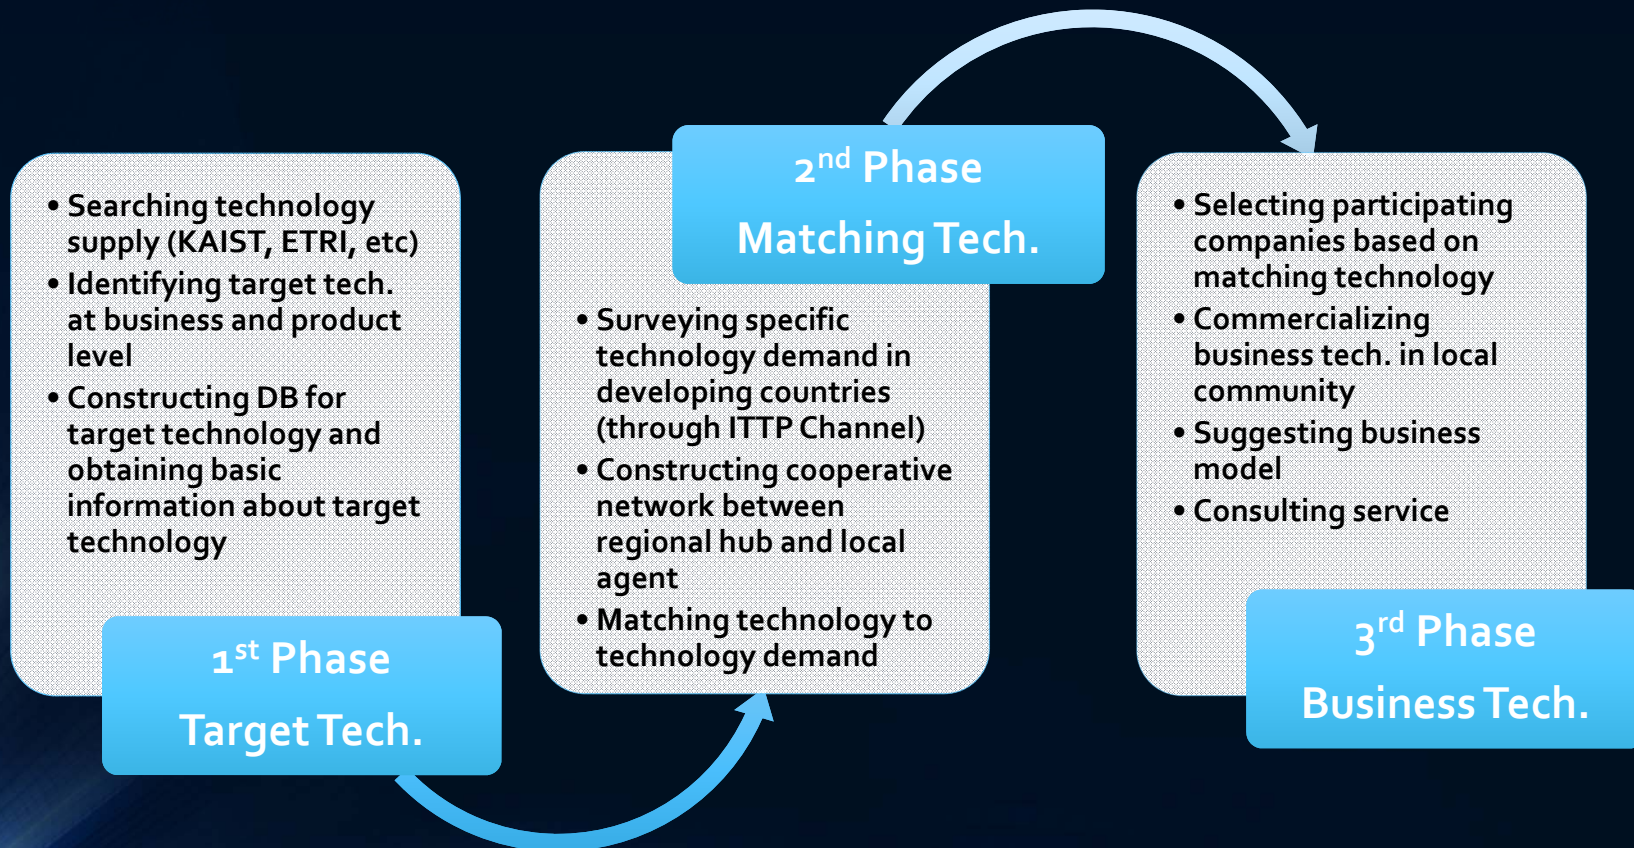

KAIST GCC Operating System.

What KAIST GCC activates.

- **Construction of global technology commercialization system**
 - Establishment of Global Commercialization Center, April 2015.
 - Set-up of technology information DB from R&D institutes and companies
 - Development of technology evaluation system for global technology commercialization, transfer and diffusion
 - Searching technology demands of developing countries and matching domestic technologies for promotion global technology commercialization
 - Construction of technology cooperative network between Korea and developing countries
 - Development of training and education system for technology commercialization
 - HRD and HRM, expert training for global technology transfer of ICT R&D performance

Sectorial Maturity Level

✓ e-Administration

LEVEL	CLASSIFICATION	DEFINITION AND SIGNIFICANCE
LEVEL 1	Definition	Laying foundation for administrative ICT and Maintenance
	Contents	Building foundations for implementing e-Government. Building organizations, personnel, systems, infrastructure environment, and maintain them. Distributing personal PCs for officials and building the infra such as communication network or security equipment for seamless information sharing. Developing and conducting basic IT training programs for all employees, and maintaining the existing systems and practices such as internal communication and services procedures relating to civil services for introducing ICT

✓ e-Citizen

LEVEL	CLASSIFICATION	DEFINITION AND SIGNIFICANCE
LEVEL 1	Definition	Building and maintaining foundation for e-life
	Contents	Building and maintaining foundations for life information services. Maintaining the existing environment, systems and practices such as the service procedures relating to civil services, for introducing e -Government.

✓ e-Enterprise

LEVEL	CLASSIFICATION	DEFINITION AND SIGNIFICANCE
LEVEL 1	Definition	Building foundation for industrial ICT
	Contents	Building and maintaining foundations for the implementation of industrial ICT services, and establishing the directions for necessary policies.

✓ e-Infrastructure

LEVEL	CLASSIFICATION	DEFINITION AND SIGNIFICANCE
LEVEL 1	Definition	Establishing directions for National(central government) based services and investigating policies
	Contents	Establishing directions and investigating policies for National(central government) based information services

What KAIST GCC plans until 2020.

1st Phase: 2015~2016

- Establishment of Global Commercialization Center (GCC)
- Construction of global commercialization infrastructure in ICT and scientific technology fields
- Construction of technology cooperative network for global regional hub
- Selecting domestic company to participate global technology commercialization

2nd Phase: 2017~2020

- Expansion global commercialization to various developing countries
- Expansion the number of technologies transferred or commercialized
- Expansion cooperative network to regional hub and regional sub-hub

Concluding Remarks

To create a global commercialization of ICT and Science & Technology for developing countries, Global Commercialization Center (GCC) was established at KAIST.

KAIST GCC plans to construct global cooperative network between Korea and developing countries to provide systematic support infrastructure for global technology transfer and technology commercialization. To construct global cooperative network, KAIST GCC would like to collaborate with KAIST Global IT technology Program of KAIST (ITTP) which is an IT-customized international scholarship education program for foreign countries as well as R&D institutes and SME in Korea.

KAIST GCC would like to help many domestic institutes or companies to connect local partner companies in developing countries and open a new era of hope and happiness for our global development and cooperation of international society through global and innovative technology commercialization.

Thank you so much.

mk1515@kaist.ac.kr, Director of KAIST, GCC MunKee CHOI, Ph.D.
