## Legal framework

- Telecommunications law 2001, 2004, 2008
- Foreign Investment Law 1993
- Strategic Entities Foreign Investment Law (SEFIL) in the May 2012 and its regulations March 2013
- Investment Law October 2013
- Securities law 2004, 2013
- Corp Income tax (CIT) 2008
- Personal Income Tax (PIT) laws 2008
- Value added Tax (VAT) 2008

# Cooperation background

- ❖ **Long history**; According to a history, since the mid 400 AD started. In 479 AD, Mongol Nurin Khan negotiated with the Korean Goguryo King to establish an alliance and invade Manchu-descent Didogan.
- ❖ **Diplomatic relations** between Mongolia and South Korea were established relatively late, in 1990, despite the ancient ties between the two nations.
- ❖ **High-level Visits** Between Mongolia and Republic of Korea (1999.05. President Kim Dae-jung, 2006.05. President Roh Moo-hyeon, 2011.08. President Lee Myung-bak)
- ❖ As of November 2011, ROK is the **fifth** largest investment partner of Mongolia.
- ❖ The **investment** sectors include following :
  - **44.4%** is trade and public catering services,
  - **11.1%** is geology, mining exploration and production,
  - **4.3%** is information and communications technology,
  - **3.3%** is health and beauty sector, and
  - **36.9%** is other sectors. Totally, 279.7million USD. (as of 2010)
- ❖ **1973** Korea-invested companies are registered in Mongolia.

# Introduction MeGO

## VISION

We envision a community in which every citizen can benefit from the use of advanced and innovative technology for their gratification.

## MISSION

Our mission is to provide ICT and e-Government capacity building and technology support for the Government, Business, Citizen and Research organizations to achieve mission-driven results, which deliver long term citizen benefits from e-services.

# Introduction MeGO

## WHAT WE DO

- We do believe that our vision and mission statement will guide us to develop and deploy the Mongolian e-government/e-security training curriculums with their strategic plan by using variety of strategic development and collaboration of our experts in these major.
- E-Government NGO of Mongolia is dedicated to deliver most advanced innovation and technology to the Mongolian Government and business for its best performance.
- Our strategy is to build a bridge between Government, Business, Research and Training institutes and Technology through our NGO. We believe that effective communication between Government, Business, and NGO is the key to the Mongolian successful ICT development, and e-services delivery.
- E-Government NGO of Mongolia is planning to establish a professional network between developed countries and Mongolia in the field of information technology, information security (IS) and education.

# Cooperation with Government

## Cooperation with Government organization

- ❖ Ministry of Education, Culture and Science (MECS)
- ❖ Information Technology, Post and Telecommunications Authority
- ❖ Communications Regulatory Commission
- ❖ Science and Technology Fund
- ❖ National IT Park (NITP)

# Cooperation with companies

## Cooperation with companies & SME

# Present activities

## Present activities

### International:

- The FCO's cyber security capacity building programme 2015-16

### Local:

- Consulting service for Supply chain management system - (Mining company)
- Consulting service for ERP supplier selection module - (Mining company)
- Consulting service for warehouse RFID - (Mining company)
- Tech survey with National Technology park

# Expectation

## Further MeGo & companies expecting activities in Technology Commercialization

- Establishment of a cooperative network between Korea and Mongolia to transfer emerging technology and outsourcing Mongolian IT entrepreneurs.
- Establishment of IT, and Information Security training center for government officials and enterprises.
- Promotion of e-government applications.
- Conducting scientific research on technology need, diffusion and forecasting.
- Active cooperation with GCC in ICT field.
- Make a bridge between Mongolian and Korean entrepreneurs

# Survey

## COMPANY PROFILE

SUMMIT COMPUTER TECHNOLOGY LLC  
2014

### Information Technology and Consumer electronics

#### Information technology solution

- System integration
- Infrastructure services
- Professional consultancy
- Information technology audit, outsourcing
- Network solutions
- Network management
- Server management
- Security services

- Summit is major Information Technology company in Mongolia
- 150 professionals throughout the country
- 20% certificated engineers
- Yearly revenue 30 000 000 USD
- More than 60 projects per year

# Survey

- Critical power local leader
- System integrator data center area
- Structure cabling local leader
- 10 years in business
- Strong engineering capability

# Survey

## VISION

Our vision is to help people and companies to increase their effectiveness, efficiency and creativeness through the use of IT technologies. We aim at delivering services that meets needs and demands of our customers and establishing long-term partnership with them.

- Super Assist system LLC was founded in 2010
- Our activities
  - Software development
    - Windows application
    - Web application
    - Mobile application
  - IT consulting services
- Main fields and direction of system development
  - Medical system development
  - Logistic system development
  - Database management system
  - System development for education sector

MedInfo

ENERGY efficient

# Survey

**Our Vision.** Innovative technology solution provider.

**Our Mission.** Bringing latest technology solutions for our customers at most affordable costs.

**Our Strategy.** Research -> Diversification -> Sustainable growth.

# Survey

## VISION:

To be leading company in IT based medical field

# Expectation (Mongolian companies)

**COMPANY PROFILE**  
SUMMIT COMPUTER TECHNOLOGY LLC  
2014

1	<b>Livestock house management system having a high-rise structure (based on a distributed sensor network)</b>	TT/CP	This system is an integrated monitoring system for livestock house management using a distributed sensor network. It includes installation of monitoring sensor for environment (temperature, humidity, ammonia, carbon dioxide, and roughness), operating properly housing facilities with the given conditions (lighting, ventilation fans, scrapers, etc.), and maintaining the prime conditions for breeding. It can be controlled by integrated monitoring and smart devices.	Yes(●) No( )	ETRI
2	<b>Smart Agriculture Plant System (SAPSys)</b>	PL/CP	This is a hardware and software platform of smart agriculture plant and consists of control technologies, interface, and smart system using a wireless sensor network for optimal growing environment. It is available to share various DB of food growth through cloud system.	Yes(●) No( )	KETI/맥스포
3	<b>Smart Cold Chain System</b>	TT/CP	This system is an integrated system of sensor tags, readers, and service software to manage and control temperature each product as well as vehicle and storage. It can provide temperature history of each product unit to consumers by maintaining the freshness of product.	Yes(●) No( )	KETI
4	<b>Enterprise Knowledge Portal</b>	PL	Enterprise Knowledge Portal(EKP) increase a productivity in a group by providing functions such as decision making, sharing information, document management, storage of knowledge and communication. Target Customers: Enterprise, Financial Group, Government and Public Institution, Educational Institution, SMEs. Refer to 'Enterprise Knowledge Portal' in additional attachment (GCC Responses for BizTech Survey)	Yes(●) No( )	가온아이
5	<b>Environmental control system for greenhouse tomatoes</b>	TT	This system performs environmental monitoring functions and serves to control the suitable environment for the growth of crops using sensors or actuator in greenhouse. The user can measure environmental information, control greenhouse environment, provide the interface to check the status via operating system.	Yes(●) No( )	ETRI

# Expectation (Mongolian companies)

IoT, Home Automation, Education, DIY open platform

When you want IoT or Home automation but

- ... consumer devices are not programmable, flexible or expandable ...
- ... you are new to C/Java programming or electronics ...
- ... making custom HW/SW embedded design will take time and cost ...

## Key features

You can choose **ORDO**

- Targets multiple application & end users (hobbyist, schools, DIY automation, IT environment, embedded systems)
- Could be used straight out of box (consumer product, soldering not needed, wiring not necessary)
- Extendable – 3<sup>rd</sup> party or DIY custom hardware, software (open platform)
- Several programming options (from configuration-like rules to classic OOP)
- Low cost - controller 40-50 USD, sensor & actuator nodes 10 USD

## Design & Architecture

- Controller(s), sensor nodes, actuator nodes, wireless and wired, support for some 3<sup>rd</sup> party products
- Wireless Mesh + Hierarchical tree topology
- Firmware/OS: **Hardware Abstraction Layer** + Custom Interpreter (Virtual Machine)
- Design & configuration tools - GUI, HMI, font, widgets, database
- Front-end for Web, mobile app, desktop application

## Hardware overview:

- |  |  |
|--|--|
| <ul style="list-style-type: none"> <li>• Controller: Ethernet, Wi-Fi, IEEE 802.15.4 / nRF24, RS-485, IR io, 2G/3G cellular, LCD touch screen, RTC, SD card, GPIO terminal screw blocks, DIN rail mount</li> <li>• Sensor &amp; actuator: IEEE 802.15.4 / nRF24 MCU+RF+hardware AES-128 SoC ULP</li> <li>• Support for 3<sup>rd</sup> party Wi-Fi, SNMP, Modbus devices</li> <li>• Of the shelf technology: STM32 ARM Cortex M3/M4, ESP8266, SAM R21 / nRF24LE1, Wiznet W5500...</li> </ul> | <p><b>Programming options:</b></p> <ul style="list-style-type: none"> <li>Dummy level – Rule based logic</li> <li>Newbie level – Flowchart logic</li> <li>Starter level – BASIC</li> <li>Advanced level – OOP (VM)</li> <li>Pro level – C/C++ (native code)</li> </ul> |
|--|--|

# Expectation (Mongolian companies)

## “SUPER ASSIST SYSTEMS” LLC

### Super Assist Systems interested in following TechBiz

Medical ICT	Medical Platform, Medical Information Exchange, Medical Information DB	We have developed programs and information systems for health sector in Mongolia since 2010	TT PL CP
Logistic ICT	Logistic Information system	We have developed information system for logistic company in Mongolia for 3 years. We have plan to develop current system in the future.	TT PL CP
System S/W	Data Management S/W	We develop data management systems in Mongolia since 2010	TT PL/CP

# Expectation (Mongolian companies)

## MICROCITI LLC

### What we do:

#### Drip Irrigation:

- ✓ Consultancy;
- ✓ Solution providing;
- ✓ Calculation;
- ✓ Equipment sales;
- ✓ Installation;
- ✓ Training;

#### Mobile, compact Irrigation:

- ✓ Consultancy;
- ✓ Equipment sales;
- ✓ Configuration;
- ✓ Training;

### What is next to implement:

#### Automated agriculture:

- ✓ Soil humidity;
- ✓ Soil temperature;
- ✓ Fertilizer level;

**TT and PL**

### Interest ETRI technologies:

- ✓ Env. Control system for greenhouse;
- ✓ Livestock house management system;

### OUTCOMES and ACHIEVEMENTS:

- ✓ Localized, tested technology in harsh weather condition;
- ✓ Leading technology – whistle blower;
- ✓ TT to our customers thru Microciti;

### Main challenges and needed supports:

- ✓ Lack of professional experience;
- ✓ Financial difficulties;
- ✓ Weather difference;
- ✓ New product for market;

# Expectation (Mongolian companies)

The following table describes the response items of the Mongolia TechBiz survey.

No	Item	Method	Description	Needs	Additional Request Information
1	Mobile Ultrasound Medical Device	PL	Mobile Ultrasound Medical Device can be easily with one hand, transmitting ultrasound via a built-in wireless access point to any tablet or smartphone (iOS or Android). Features: Portable pocket size (78mmWx219mmLx38mmH, 390 grams with battery), Handheld and economical price, Battery operation, Transfer image and cine via mobile network. Refer to 'Mobile Ultrasound Medical Device' in additional attachment (GCC Responses for BizTech Survey)	Yes(●) No( )	힐세리온
